

Load management

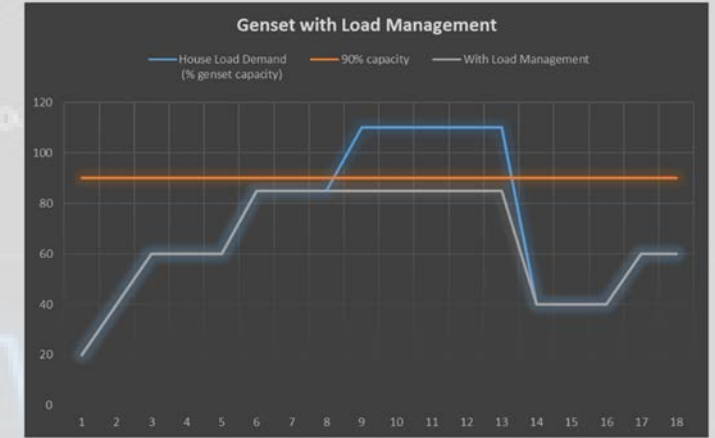

Home Generators 13-20 kW

April 2018

Intelligent load management

Genset with Load Management

(% genset capacity)

Integrated

Integrated into each generator, so no additional hardware is required

Smart

The generator learns load requirements and turns on loads only when the generator has sufficient capacity

Faster

Faster than competitor offerings because its response is amperage-based and not frequency-based

Economical

Load shed capability allows homeowners to power their home with a smaller unit
